

How to Get Unity Setup For This Class

ATTENTION: This setup tutorial is for **Macs and Windows Computers**. If you have a Chromebook or a Linux system, I recommend looking up a YouTube tutorial on how to do so (There are a lot online!)

1. If you haven't already, [Create a Unity ID](#)

The screenshot shows the 'Create a Unity ID' form. At the top, it says 'Create a Unity ID' and 'If you already have a Unity ID, please [sign in here](#).' Below this are four input fields: 'Email', 'Password', 'Username', and 'Full Name'. Under the 'Email' field, there are three checkboxes with text: 'I have read and agree to the [Unity Terms of Service](#)(required).', 'I acknowledge the [Unity Privacy Policy](#) [Republic of Korea Residents agree to the [Unity Collection and Use of Personal Information](#)] (required).', and 'I agree to have [Marketing Activities](#) directed to me by and receive marketing and promotional information from Unity, including via email and social media(optional)'. To the right of these checkboxes is a reCAPTCHA box with the text 'I'm not a robot' and a reCAPTCHA logo. At the bottom left, there are two buttons: 'Create a Unity ID' (green) and 'Already have a Unity ID?' (white). Below these buttons, there is a horizontal line with the word 'OR' in the center. Below the line are four social media icons: Google, Facebook, Apple, and a generic user icon.

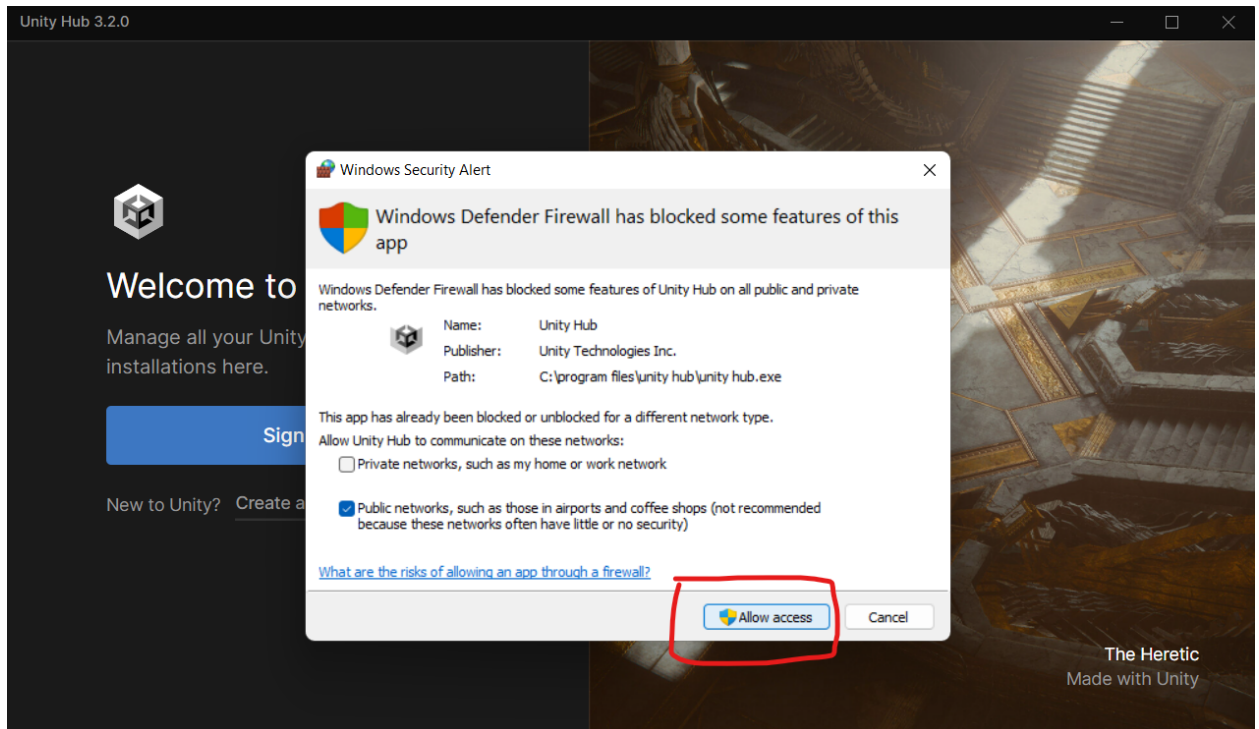

2. Click [Here](#) to download the Unity Hub Installer

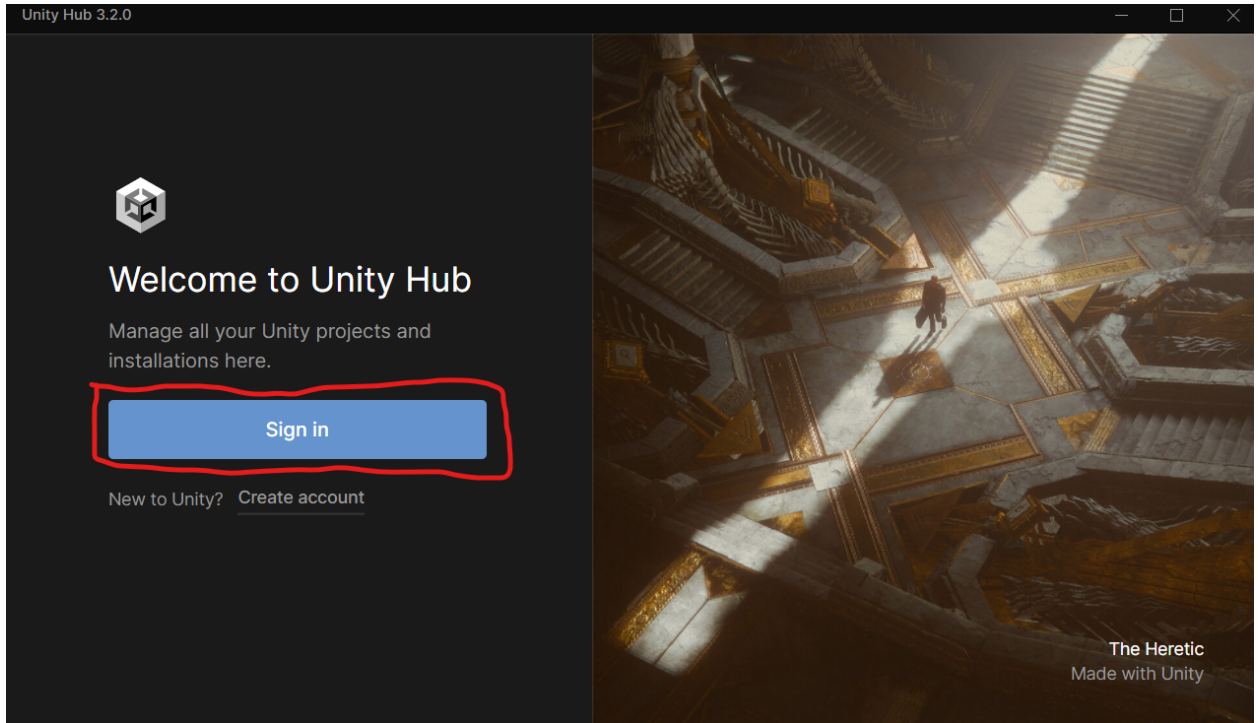

Click [Here](#) to download the Unity Hub Installer

3. Install Unity Hub

4. If you get this prompt...

5.

6. Sign into the Unity ID That you created

Sign into your Unity ID

If you don't have a Unity ID, please [create one](#).

Email

Password

☒ Remember me [Forgot your password?](#) [Help](#)

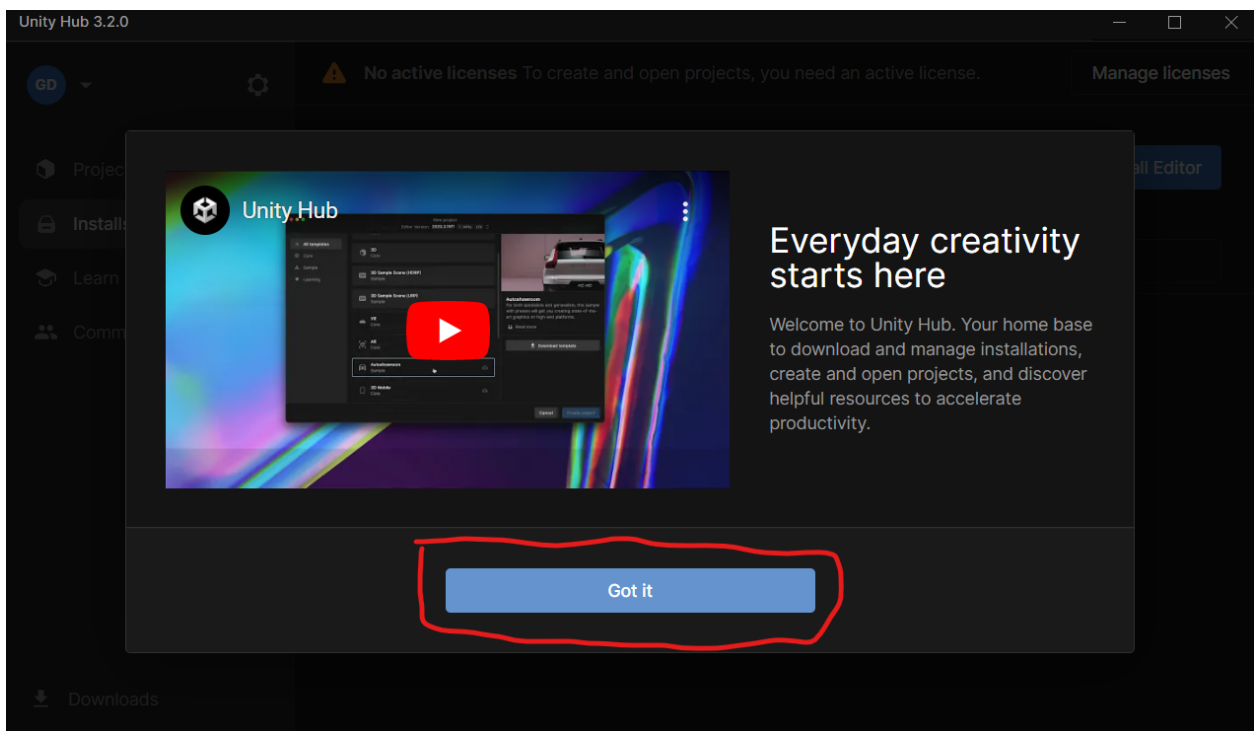

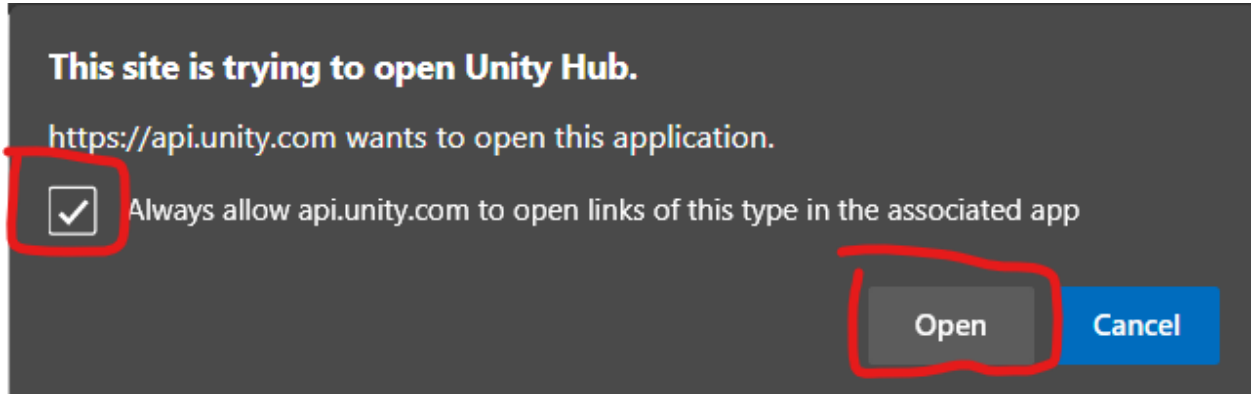

[Sign in](#)

OR

[G](#) [f](#) [A](#) [U](#)

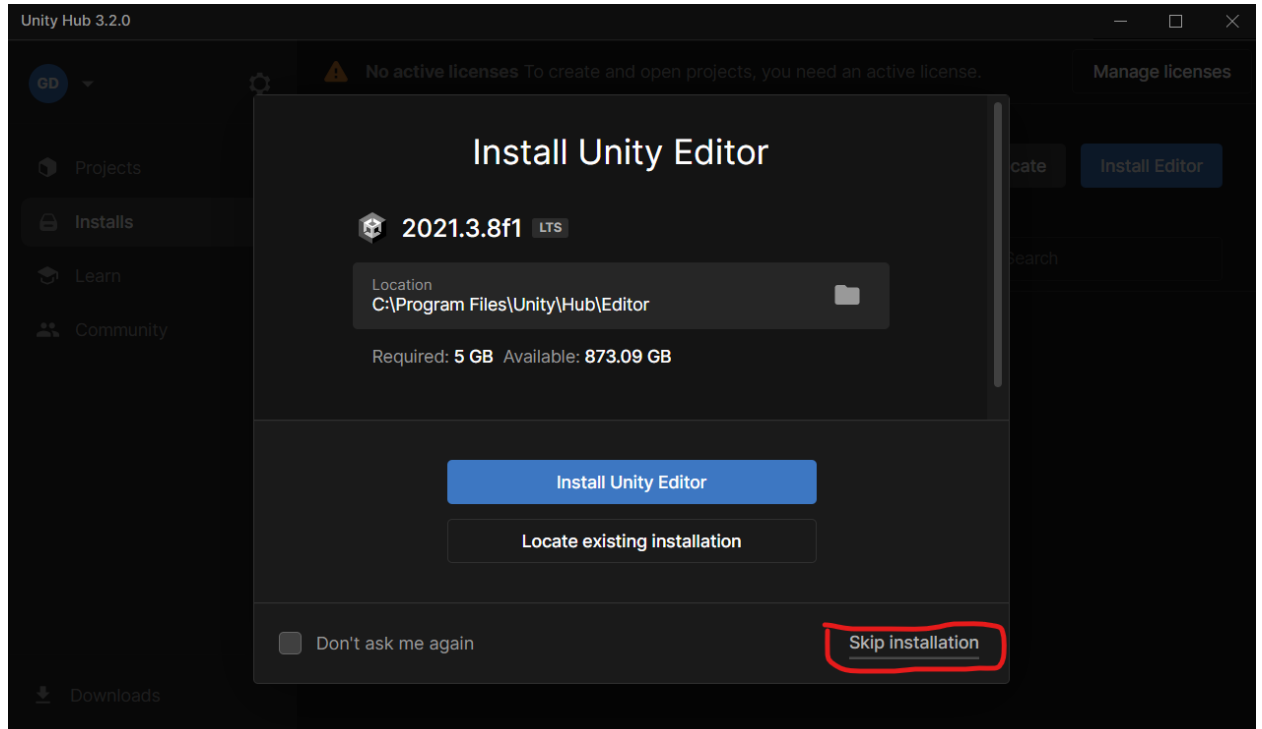

7.

8. If you see this prompt...

Unity download archive

From this page you can download the previous versions of Unity for both Unity Personal and Pro (if you have a Pro license, enter in your key when prompted after installation). Please note that we don't support downgrading a project to an older editor version. However, you can import projects into a new editor version. We advise you to back up your project before converting and check the console log for any errors or warnings after importing.

Long Term Support releases

The LTS stream is for users who wish to continue to develop and ship their games/content and stay on a stable version for an extended period.

[Download LTS releases](#)

[Unity 2022.x](#) [Unity 2021.x](#) [Unity 2020.x](#) [Unity 2019.x](#) [Unity 2018.x](#) [Unity 2017.x](#) [Unity 5.x](#) [Unity 4.x](#) [Unity 3.x](#)

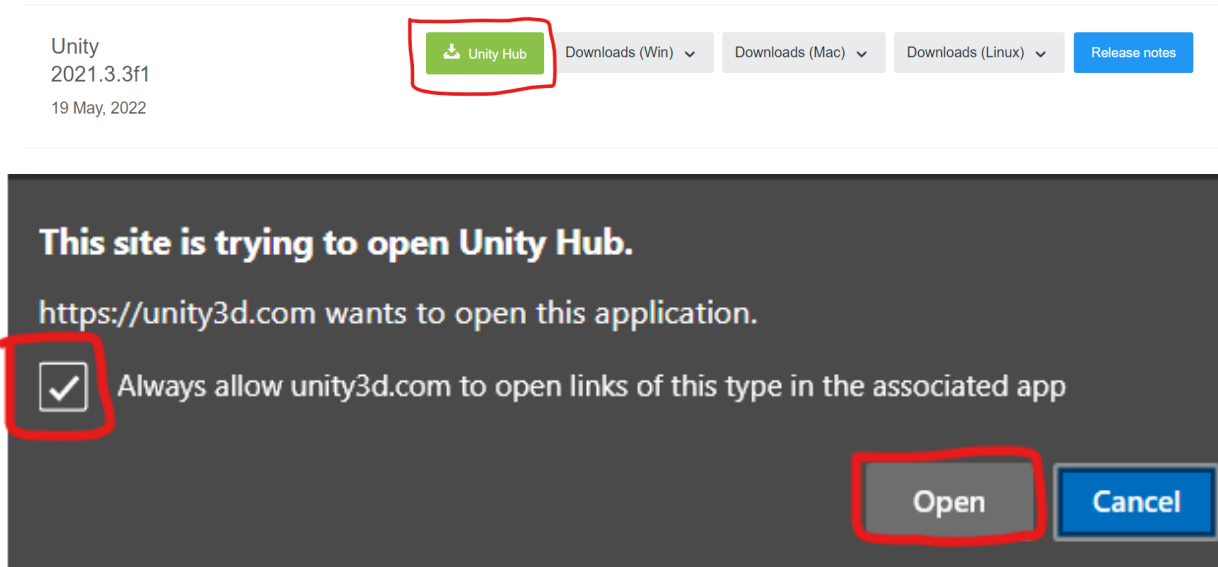

15.

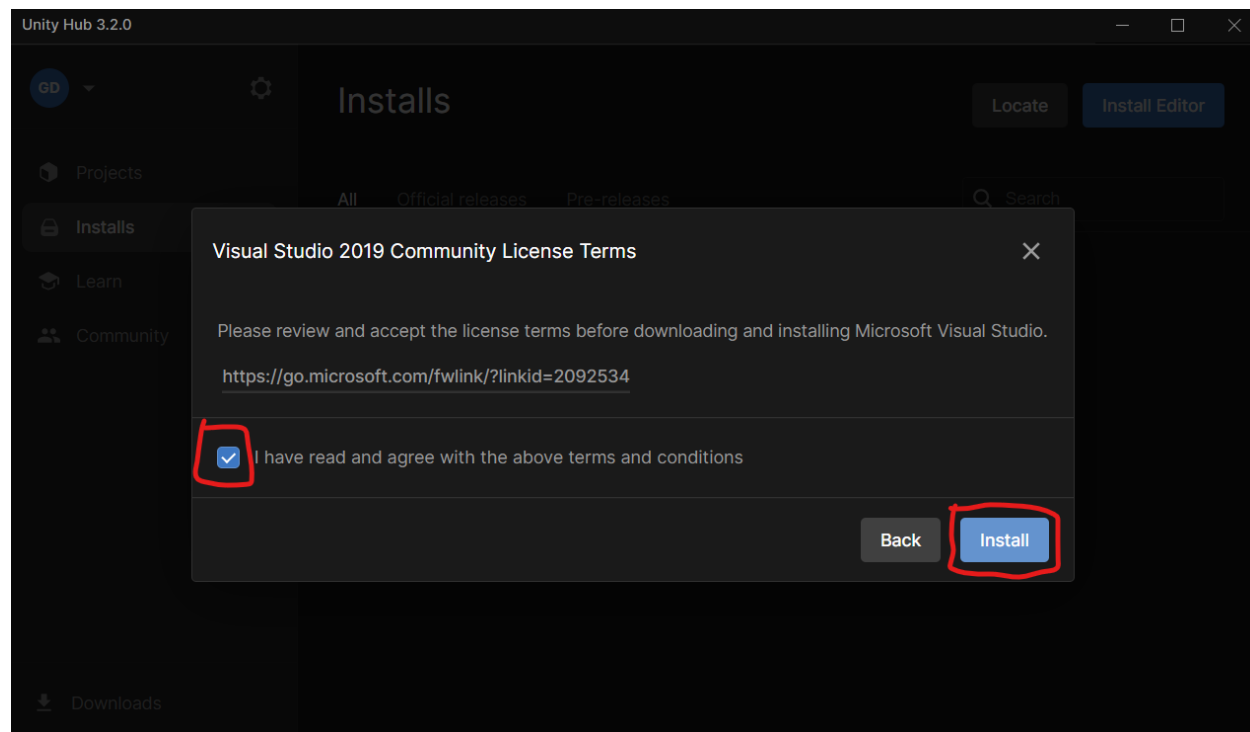

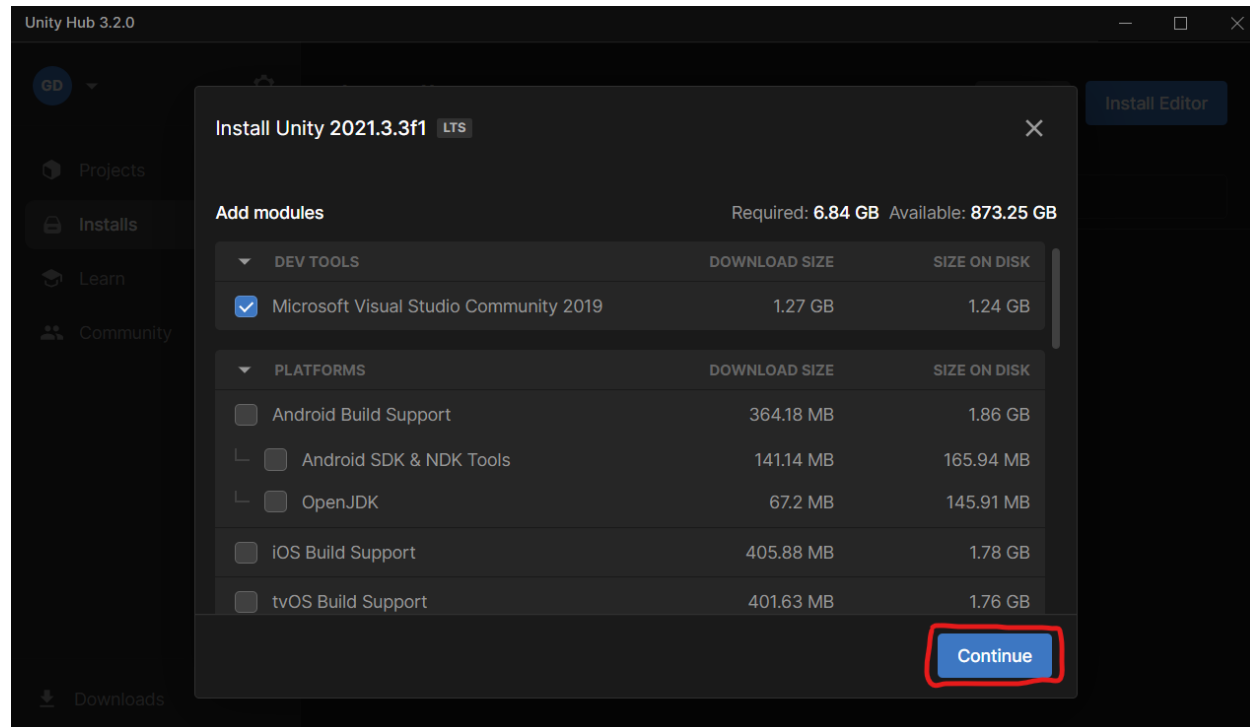

16. Scroll Down until you find **2021.3.3f1**

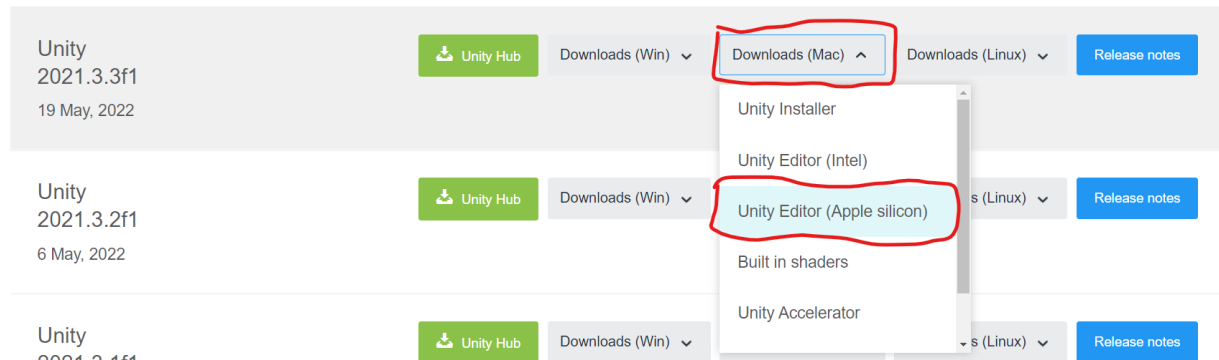

17.

a. (For Windows/Apple [Intel Chip](#) Users)

b. (For Apple [Silicon Chip](#) users)

- Show in Finder
- CMD+Click/Right Click, Open
- Installer will open, keep pressing next until installed.
